MANN'S SUPERIOR FLOWER SEEDS

Our constant aim is to supply our customers with the very best domestic and imported strains obtainable. We spare no expense in our efforts to maintain the highest standard of quality. Our list contains those varieties which are most popular because of their beauty, usefulness, and ease of cultivation.

Annuals are those which attain full growth, bloom and die the same year, and are raised from seed exclusively.

Biennials attain full growth, bloom and die the second year from the planting of seed.

Perennials produce plants the first year, which with a few exceptions do not flower until the second year from planting of seed, after which they bloom every year and last several years.

The class to which each variety belongs is indicated as follows:

A. for Annuals, B. for Biennials, P. for Perennials.

WEED PULLER

An Entirely New Principle

A slight Push and Pull thoroughly loosens the surrounding soil and removes not only the weed, but the entire root.

When pushed into the ground, the two points guide the BRIDGE down alongside the weed, loosening the soil from that side. It then crosses under the root disengaging the latter. As the tool is withdrawn the BRIDGE slips up the opposite side of the weed, loosening the ground from that side and engages the head of the weed above the ground. The now thoroughly loosened weed is readily withdrawn in its entirety with little or no clinging soil.

SPECIAL GRASSES for GOLF COURSES

Mann's Evergreen Lawn Grass

PUT UP BY US AND UNDER OUR OWN FORMULA

FINE LAWNS can only be made by using the best grade of grasses. The proper blending to give satisfactory results needs the study of years. Among some of the most beautiful lawns of Washington and its suburbs are those sown with "Evergreen" Lawn Grass Seed.

These seeds should be covered very slightly and a roller run over the ground after sowing. Pound, 40c; 5 pounds, \$1.75; 10 pounds, \$3.30.

LAWN GRASS FOR SHADY PLACES AND UNDER TREES. A selection of grasses that thrive well in shaded situations, under tree, or close to walls, where there is little sun. Pound, 45c; 5 pounds, \$2.00; 10 pounds, \$3.50.

Lawn and Garden Fertilizer

Old and New Lawns Require Stimulating after the long drag through winter, or in the fall, after the season of cutting and the heat of summer. For this purpose our high-grade Bone Meal is best adapted to the wants of the lawn. It should be sown broadcast from the middle of February to the first of May for spring, and from September to November in the fall. In preparing a new lawn use a liberal quantity and rake it in thoroughly before sowing the seed. Ten pounds sow enough for 250 square feet. Ten pounds, 50c; 25 pounds, \$1.00; 100 pounds, \$2.75; 167-pound bag, \$4.00.

PULVERIZED SHEEP MANURE FOR LAWNS. Two pounds, 15c; 5 pounds, 30c; 25 pounds, \$1.00; 50 pounds, \$1.50; 100-lb. bag, \$2.50.

SHREDDED COW MANURE. 25 pound bag, \$1.00; 100 pounds, \$2.50. Special prices in ton lots.
